

MohammadTaha HosseinZadeh Jami

Full-Stack Engineer — Python & AI Focus

Mashhad, Iran • taha.jami.0087@gmail.com • +98 933 573 9382 • linkedin.com/in/mohammadtaha-hosseinzadehjami • github.com/mohammadtaha-jami • mohammadtaha-jami.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Engineer with 3+ years of experience in Python backend development, LLM/AI integration, and PHP/WordPress architecture. Designed and delivered scalable backend systems and web applications from conception to deployment, spanning FastAPI, Flask, Django, and React. Experienced in applying AI-assisted development ("Vibe Coding") methodology to accelerate delivery and convert complex business logic into production-ready code.

WORK EXPERIENCE

Full-Stack Developer — Baltazar Team, Mashhad, Iran

Aug 2024 – Present

- Designed, built, and deployed multiple full-stack Python systems — including a CRM, a team-management platform, and a treasury/budgeting platform — across the full product lifecycle, from architecture through deployment.
- Built custom PHP/WordPress plugins, including a tiered business-directory system with ZarinPal payment integration and custom Elementor widgets.
- Delivered AI-assisted automation tools — including an LLM-powered RAG chatbot, a fine-tuned PyTorch lead-scoring model, an automated YouTube content pipeline, and Telegram bots — using Python, Docker, and service-oriented architectures.
- Collaborated cross-functionally in a fast-paced startup environment, contributing to a diverse range of production projects.

PROJECTS

BudgetBox — Team Treasury & Envelope-Budgeting Platform

Full-stack team treasury platform (modular monolith) supporting central-balance deposits, per-team box allocations, project P&L tracking, role-based access control, and a bilingual (FA/EN) analytics dashboard.

Python · FastAPI · React · TypeScript · PostgreSQL · SQLAlchemy 2 · Alembic · Docker Compose

Intent-Aware RAG Chatbot System (Branding Bot) (github.com/mohammadtaha-jami/BrandingAgent)

Session-isolated Retrieval-Augmented Generation chatbot with an LLM intent router that selectively retrieves from ingested PDF/text documents to optimize vector search.

Python · FastAPI · Ollama (local LLM) · Vector Search

Event-Driven Telegram Lead Intelligence & Opportunity Detection System (github.com/mohammadtaha-jami/self-bot)

Automated Telegram-listening and lead-scoring platform processing real-time group conversations; fine-tuned a PyTorch model to score buying intent and deliver leads via a FastAPI microservice.

Python · PyTorch (fine-tuning) · Telethon · Celery · Redis · PostgreSQL · Docker

Role-Based Sales Pipeline & CRM Web App (Baltazar Flow) (github.com/mohammadtaha-jami/CRM-Baltazar)

Flask-based CRM for managing sequential lead progression, with role-based access control and customized team-performance dashboards.

Python · Flask · HTML · CSS · Git

Centralized Team Task & Project Management Web App (github.com/mohammadtaha-jami/Team-mangment-app)

Full-stack team-management application for organizing projects and tasks, with role-based access control and progress tracking.

Python · Django · React · Git

Automated Multi-Channel YouTube Video Production & Publishing System

End-to-end desktop automation for content creation and publishing — LLM script generation, TTS audio, automated video editing, and scheduled uploads via the YouTube Data API.

Python · OpenCV · YouTube Data API

Custom WordPress Plugin — Business Directory & Micro-Landing Page Subscriptions

Full-featured PHP plugin converting WordPress sites into business directories with tier-based subscriptions, a ZarinPal payment gateway, and custom Elementor widgets.

PHP · WordPress · HTML · CSS

Service Management & Multi-Format Invoice Generation System (github.com/mohammadtaha-jami/TeamProjectsManagement)

Flask web app for managing service catalogs, clients, and custom orders, with automated generation of four PDF invoice formats, including native RTL/Persian support.

Python · Flask · Tailwind CSS

Telegram E-Commerce Bot with Real-Time WooCommerce Sync

Async Telegram storefront bot integrated with a Flask admin panel, continuously syncing WooCommerce products and categories to a local database with dynamic inline navigation.

Python · Flask · SQLite

Automated Video Playback Automation & Performance Testing Desktop Suite

Desktop application driving parallel Chromium workers for video playback testing, with session-state persistence, proxy validation, and structured JSON reporting.

Python · Playwright · CustomTkinter

TECHNICAL SKILLS

Languages: Python, PHP

Backend / APIs: FastAPI, Flask, Django, REST API design, SQLAlchemy, Alembic, JWT / OAuth2

Frontend: React, TypeScript, HTML5, CSS3, Tailwind CSS

AI / Automation: LLM Integration (RAG, Ollama), AI Agents, Prompt Engineering, Information Retrieval & Search, PyTorch (model fine-tuning), OpenCV, Telethon, Celery

Databases: PostgreSQL, MySQL, Redis, SQLite

DevOps / Tools: Docker, Docker Compose, Nginx, Git

CMS / Other: WordPress Plugin Development, Elementor, ZarinPal Payment Integration, WooCommerce, Playwright

Soft Skills: Team Collaboration, Perseverance, Patient & Positive Attitude

EDUCATION

High School Diploma

CERTIFICATIONS

CS50P — Introduction to Programming with Python — Harvard University (online, edX) · 3-month course · 2024

LANGUAGES

English — Upper Intermediate • Persian — Native
